

This Discord invite is the free one just for LEAPS Trader members. This is **not** the full discord that you may be a member of. This is just a portion of the Discord that we are using in lieu of SMS - that can give you notifications for trades or thoughts. Please follow these instructions in this video to get in:

YouTube video: <https://youtu.be/dKnnalrZVIA>

This is the link I mention in the video to use to get into the Discord:

<https://discord.gg/H93RYRpUDq>

If you are ALREADY in the Discord just reply with who you are and I will permission you for those rooms.

A couple of questions came up today:

1) can I get email updates instead of Discord?

Answer: Absolutely - all normal communication will continue as before via email. Trade ideas will go via both so don't worry if you don't dig the Discord thing - I get it, it's kind of intimidating if you haven't seen it before! I like old school email.

2) is this new Discord Alerts thing the same as the regular Discord?

Answer: No, the free alerts Discord is just alerts (so make so you have the Discord app notification set up) and some small commentary.

The regular Discord, that you may be a member of or trialing as a new member, is an additional service that has other kinds of trades and guidance and risk gauges and research etc... deeper options analysis (skew, options pricing level analysis etc...). It is ENTIRELY unnecessary for LEAPS Trader. But I make it available because some folks want to dive in and have the time and desire to do so.

Bottom line: you don't have to be in any Discord whatsoever. LEAPS Trader is a stand alone product and experience.

3) what's with all the courses - I don't know where to start??

Answer: I go over some of this in the Getting Started Guide (attached) but in a nutshell this is it:

LEAPS Trader is long options for direction/leverage/stock replacement/explosive trades.

Sometimes it will have income layering (HOOD right now, NBIS a month ago, NFLX 3 months ago). Also sometimes, with extra hedges - puts. LEAPS are by definition hedged due to limited risk: for example instead of buying 100 shares of AMZN for \$23,000 you can buy 1 contract of the June2026 \$190 strike for \$5,000. See, limited risk for similar exposure.

IF you also did a "bundle" you also received:

A) the Crush the Premium Income Method: This is an income wheel strategy that includes the 2% Method I like to teach. More boring, repeatable and consistent ways to generate cashflow WHILE respecting the upside, which the included MTI indicator will help you know. Has little to do with LEAPS Trader.

B)The Nomad: an Iron Condors workshop (iron condors are directionless strategies)

C)Volatility Ninja: deep dive into where the edge is in options trading and income trading. I am very proud of this course - there is nothing like it around. But it can get rather deep so at the very least **I would like all of you to watch the first 3 lessons**. These could change the way you look at trading and investing and sentiment. I consistently receive feedback as such (including 2 weeks ago at the live event, which you can watch here if you missed it: <https://youtu.be/BG5hoT4p-JM>)

Bringing it all together: The world of options really comes down to 2 approaches: income and leverage. You either hold leverage, or you have sold leverage to someone else. But they can both be done better, and isolating this has been part of my life's work. Getting people to realize that while there is always risk, there are ways that we can and must mitigate it.

So LEAPS = smart leverage

Crush the Premium = smart income

Nomad: additional volatility insight and full iron condor income system

Ninja: just get better at ALL of it. This crystalizes is all into a philosophy and approach for success. Most programs out there are simple and stupid, and meant to take your money. I actually want you to get this stuff figured out.

All of this together should make you a better trader and investor. I don't want it to be confusing but I want you to get as much value as I can give you in this format.

Read the Getting Started Guide and take it slowly!

Let me know if you have any questions.
